

PARK KIT

THE WIFI ENABLED GUIDING LIGHT FOR COMPLETELY TOUCHLESS PARKING

PARK-KIT

DRIVE INTO THE TOUCHLESS PARK-KIT LOT OF THE FUTURE

Our super efficient, WI-FI enabled, LED lighting with a built in parking guidance system is, by far, the most advanced and lowest cost parking and lighting system in the world.

MEMBERS ENTRY TO A PARK-KIT GARAGE

Members with the **PARK-KIT** app and a FREE RFID windshield pass can enter and exit any **PARK-KIT** lot automatically. New members can get the windshield passes from multiple printers in any **PARK-KIT** lot.

THE PARK-KIT ADVANTAGE

All member's information is stored securely on **GOOGLE PAY'S CLOUD**.

Google Cloud Platform

HOW THE **PARK-KIT** GUIDANCE SYSTEM WORKS

As drivers enter the parking area **FLASHING COLORED INDICATORS** ATTACHED TO THE LIGHTS direct them down aisles to empty parking spaces. Each aisle light monitors up to 6 spaces, 3 on each side of the aisle. The actual colors of our **FLASHING INDICATORS** are shown above. When all 6 spaces are full the **COLORED INDICATORS** turn **SOLID RED**.

GREEN → **OPEN SPACE**

MAUVE → **HANDICAP SPACE**

BLUE → **ELECTRIC VEHICLE**

GOLD → **VALET PARKING**

SOLID RED → **OCCUPIED**

PARK-KIT

Non-members can make tap-and-go payments to open the gate with enabled credit or banking cards and are issued a ticket with a QR code to download the **PARK-KIT** app. If non-members don't apply for membership they tap-and-go to leave where a payment receipt with the **PARK-KIT** app QR code is issued.

In this way parking payments are guaranteed and non-members are reminded of the benefits of membership.

NON-MEMBER ENTRY TO **PARK-KIT**

These are the tickets issued at entry and exit that non-members, without their RFID passports, take to open the barrier gates. There is an Apple QR code on one side and an Android QR code on the other.

THE **PARK-KIT** ADVANTAGE

Every **PARK-KIT** lot has high speed WIFI everywhere. Drivers can send/receive texts, download the **PARK-KIT** app or make calls in the comfort of their cars.

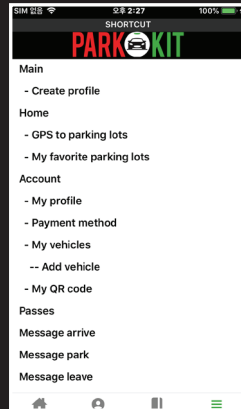

THE PARK-KIT APP IS EASY TO DOWNLOAD

For our members who have downloaded this app, there is no lining up for payment kiosks, no fumbling with credit cards, no worries about parking overtime, this is a once and forever, seamless, parking experience. See the easy to access functions of our app below.

NOTE: there is advertising space at the bottom of the 3 BLACK PARKING TEXTS that members receive. Garage owners/operators can earn extra revenue by using this space as a "billboard" for other businesses or for promotions/messages to the members.

PARK-KIT

A HIGH SPEED FUSION OF TECHNOLOGIES

Once **PARK-KIT** members have followed colored indicators to a chosen parking area, like an electric vehicle charging station or a handicap parking space; their license plate is "read" by a tiny camera and is then instantly matched with the license number on their RFID passport which was recorded on Google Cloud as they entered the lot.

↑ **PARK-KIT** ↓ FLASHING INDICATORS ↑

	REGULAR	ELECTRIC	HANDICAP	VALET
P1	14	10	7	0
P2	28	1	2	6
P3	53	12	5	0
P4	1	0	0	0

STEADY RED INDICATORS = SPACES FULL

Screen at entry with vacant parking spaces.

Off-site screen with occupancy in real time.

The color of the Indicators and dimming level of the light are easy to change.

Two cameras monitor parking spaces and license plates on either side of the parking aisle. Each aisle light supports up to six cameras, two outboard at each side of the light and two built into the fixture.

The color of the Indicators and dimming level of the light are easy to test on site.

Licenses 'READ' on entry & in parking space.

How our cameras 'READ' license plates.

THE PARK-KIT ADVANTAGE

PARK-KIT APP USERS get their own QR code which allows for the seamless payment of UPGRADE SERVICES like charging stations. These payments are listed on the QR page of our app then added separately to the payment text a member receives on exit.

THE MULTI-FUNCTIONAL PARK-KIT AISLE LIGHT

ON BOARD COMPUTER

- A universal WIFI system relays communications between lights.
- Each light contains a quad computer with huge processing power.
- The on board computer recognizes full or empty spaces.
- This computer houses a program for "READING" license plates.
- The license plate program "READS" all North American plates.
- Each light networks with all the others or can be linked into groups.

SIX CAMERAS PER LIGHT

- Up to six tiny cameras scan up to 6 parking spaces every second.
- If one of these parking spaces is empty THE INDICATOR is GREEN, BLUE or MAUVE.
- If all of these parking spaces are full THE INDICATOR turns RED.
- The color of THE INDICATORS are easily changed via a hand held device.
- There are 8 DIFFERENT INDICATOR COLORS that can be selected.

CONTROL THE LED LIGHTING

- A motion detector detects movement and dims the lights.
- Any number of lights can be chained together for dimming.
- LED directional optics bend the light to cover a wider area.
- No over-vehicle light needed, reducing the number of lights by half.

Patented LIGHTING and GUIDANCE technology in one multi-functional system!

WIFI AND FUNCTION CONTROL SYSTEM ALL-IN-ONE SETUP

This is our multi-functional WIFI aisle light showing green indicators at each side and camera domes facing parking spaces.

ADVANTAGES FOR PARKADE OWNERS

THE BOUTIQUE **PARK-KIT** GARAGE EXPLAINED

- **PARK-KIT** reduces frustration and CO gas emissions by guiding drivers to empty spaces.
- **PARK-KIT** saves energy by monitoring CO gas and turning on fans with an add-on function.
- Boutique parking with WIFI and many EV chargers attracts clients.
- Valet space near elevators rents at higher rates and has its own RFID entry gate.
- Washrooms, EV chargers and vending machines payments are made with QR codes.
- Special discounts or "PARKING PACKAGES" can be awarded at lower rates.
- **PARK-KIT** runs on OPEN-SOURCE propriety software with no other payments to make.
- **PARK-KIT** lights are easy to install and come pre-programmed from our factory.

SPECIAL FEATURES INCLUDED

- Significant cost and maintenance savings.
- **PARK-KIT** is priced well below competitors.
- Secure information on Google CLOUD.
- Environmentally friendly LED lighting system.
- Can change parking rates for special events.
- Can protect prime parking areas.
- Can enforce designated worker parking.
- Can monitor unpaid parking.
- Can change parking rates as day progresses.

ADD-ON CAPABILITIES
